Professional Summary

Entry-level Software Developer experienced in front-end development and supporting back-end systems. Proficient in **HTML**, **CSS**, **JavaScript**, with working knowledge of **C#**, **Python**, **SQL**, and **Git**. A fast learner who builds scalable, maintainable solutions with a user-focused approach.

Technical Skills

Programming Languages: JavaScript, Python, C#, Java

Frontend Development: HTML5, CSS3, Tailwind CSS, JavaScript, Responsive Design

Backend Development: Python (FastAPI), Pydantic, Pytest

Databases: SQL (Joins and CRUD)

Tools & Platforms: Git, GitHub, Figma, NPM, Windows Forms

Education

Bachelor of Information Technology

Crown Institute of Higher Education

June 2025 – June 2026

Employment History

Software Engineer Intern

Siteagle Technologies

March 2026 – Present

Canberra, ACT, Australia

Contributing to backend development using Python, FastAPI, and Pydantic to build scalable RESTful APIs with structured validation and modular architecture.

Developing and testing 5+ API endpoints using **pytest**, ensuring reliability, performance, and correct data handling.

Building data validation tools for CSV/XLSX processing using JSON schemas and supporting microservices development including QR code generation and document processing with qrcode, Pillow, and PDF tools.

Supervisor

Society Coffee Co.

Oct 2025 – Present

Belconnen, ACT, Australia

Coordinated daily café operations including opening/closing procedures and staff task allocation, improving workflow efficiency during peak periods.

Managed cash handling and financial records with high accuracy, ensuring consistent operational reliability.

Trained and supervised staff in POS systems, customer service, and beverage preparation, strengthening team performance and communication.

Barista

Society Coffee Co.

Oct 2024 – Oct 2025

Belconnen, ACT, Australia

Delivered high-volume coffee and beverage preparation while maintaining consistent quality standards in a fast-paced environment.

Processed customer transactions accurately while maintaining attention to detail.

Supported team operations during peak hours by improving service flow and customer experience.

Software Developer

MyCreativePanda Inc.

Sep 2020 – April 2021

Tarlac, Philippines

Designed and maintained responsive front-end components using **HTML**, **CSS**, and **JavaScript**, ensuring usability, consistency, and performance across web applications.
Managed and optimized **SQL** databases by writing and executing **join queries**, maintaining data integrity, and performing routine backup and recovery operations.

Personal Projects

Vanta – E-Commerce Website Application

2026 – Present

Developing a modular e-commerce web application using **HTML**, **Tailwind CSS**, and **JavaScript (OOP)**, implementing scalable architecture and localStorage-based state management.
Implemented **SHA-256 password hashing** to enhance user authentication security.
Built a **mobile-first responsive UI** with dynamic product listings and an admin dashboard for product, variant, and stock management.

Personal Assignment and Task Tracker (Assignment Management System)

2025

Built a task management system with full CRUD functionality to support structured academic task tracking.
Designed a mobile-first interface using Calendar.js with dashboards for To Do, Ongoing, Review, and Completed states.
Applied object-oriented programming and modular JavaScript design to improve scalability and code reusability.

Point of Sales and Reservation System – Windows Form Application (C#)

2022

Developed a Windows Forms-based POS system in C#, including inventory, reservations, transactions, and reporting for end-to-end retail operations.
Scaled system reporting to handle **5,000+ records**, improving data tracking, retrieval efficiency, and operational accuracy.
Implemented **SHA-256 password hashing** and optimised database workflows to enhance security and eliminate manual processes.
